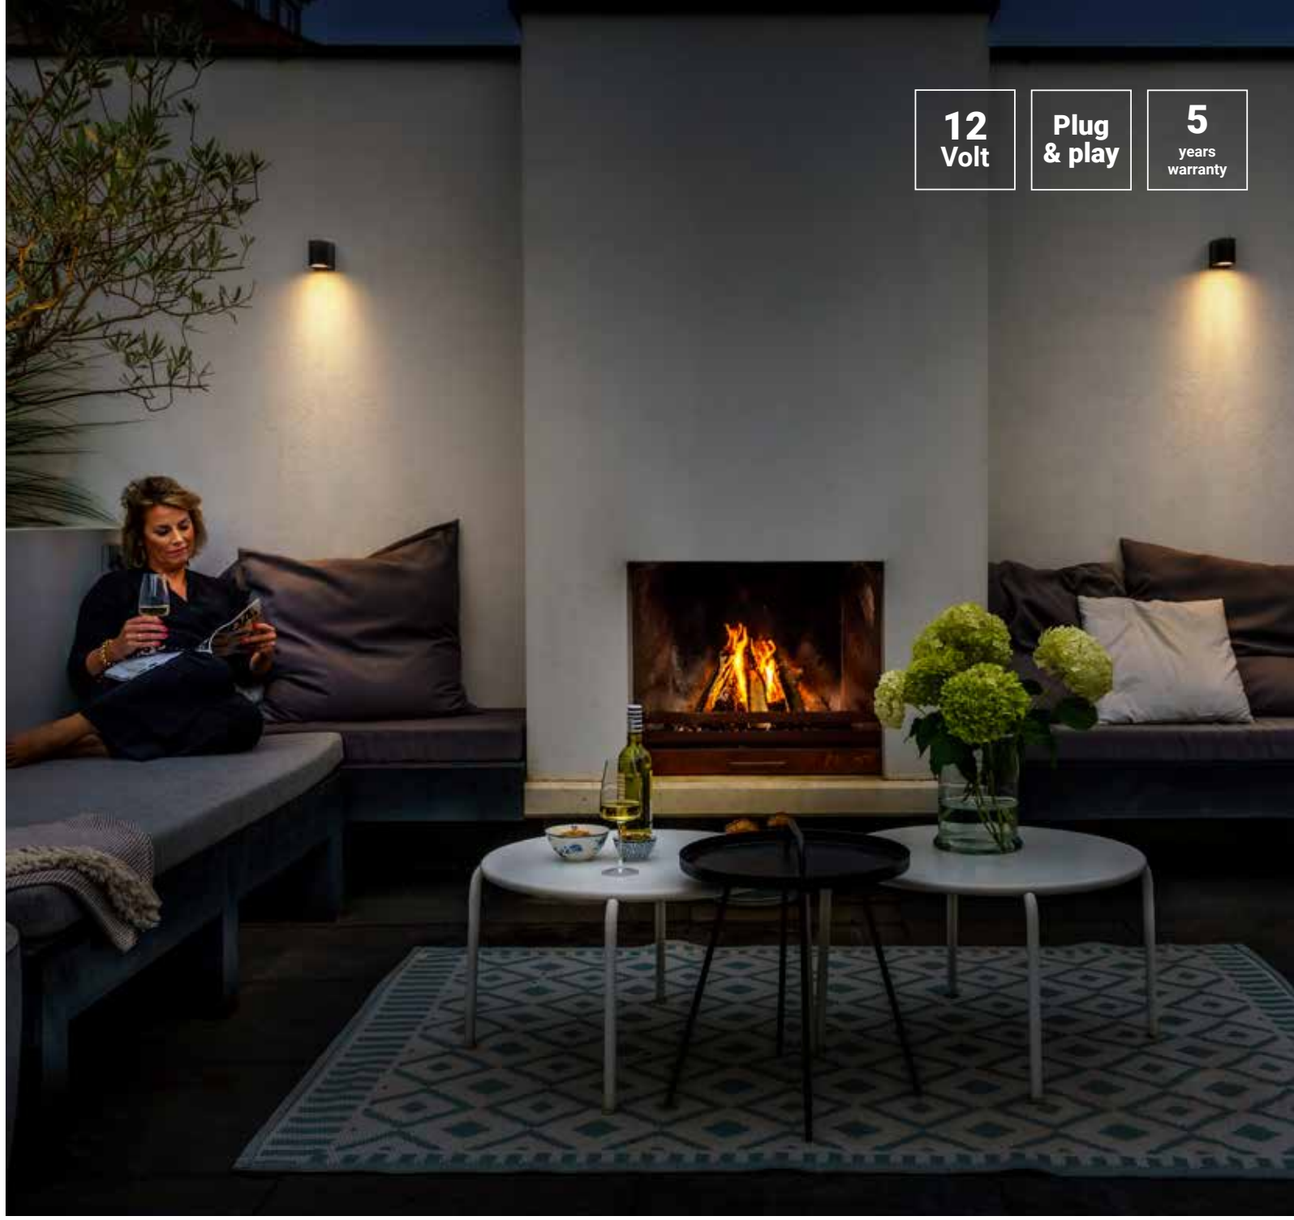
Enjoy your outdoor lifestyle all year round

Whether spring, summer, autumn or winter, the 12-Volt outdoor lighting from Garden Lights allows you to enjoy your garden until late into the night.

Outdoor lighting plays a major role in the design of a garden. With outdoor lighting, you can be creative in combining atmosphere and functionality. Garden Lights has a wide range of fixtures that will suit all tastes and budgets, whether you want to enjoy beautiful wall lighting or shine a spotlight on a hedge or shrub. With some spotlights, post or decklights, there is a solution in the range for every tree, shrub, pathway or decking!

Outdoor lighting is used for various different functions. Of course, we often talk about creating a visually appealing garden, but lighting can also be functional. Are you tired of returning home in the evening to a dark pathway leading to your front door? Illuminate the path using beautiful post lights. These are also really important for safety reasons.



Advantages 12 Volt system

- **Very easy to install yourself**
- **It is not necessary to bury cables**
- **Safe for people and animals**
- **Easy to expand**

Garden Lights

Scan this QR code for all installation videos or visit www.youtube.com/GardenLights.

Easy installation

1. Choice of lighting

Whitin our wide product range, you select the fixtures with which you want to attractively illuminate your garden, driveway, fence, or pond. See page 14-31.

2. Choice of transformer

The total wattage of your chosen lighting determines the wattage of the required transformer. Add up the number of watts of the lights + accessories. You can then choose a 24, 60 or 150-watt transformer. Tip: always provide some extra space in terms of wattage if you choose to add a light or accessory in the future. See page 32.

3x Wall light Mauri:	*18 watt*
2x Spot light Neso:	*4 watt*
4x Post light Limosa 70:	*14 watt*
Total	*36 watt*

Advice: 60 watt transformer

3. Choice of main cables

Here you have a choice of 2 systems:

System Flex: The flex main cable **without** fixed connectors. within the separate Flex connectors, you can choose where to connect the light to the main cable. This cable is available in 10, 25 and 50 meters.

System Fixed: The main cable **with** connectors at fixed points. This cable is available in 10 and 15 meters.

Optionally, you can expand the system with a cable divider, an extension cable and other accessories. See page 33.

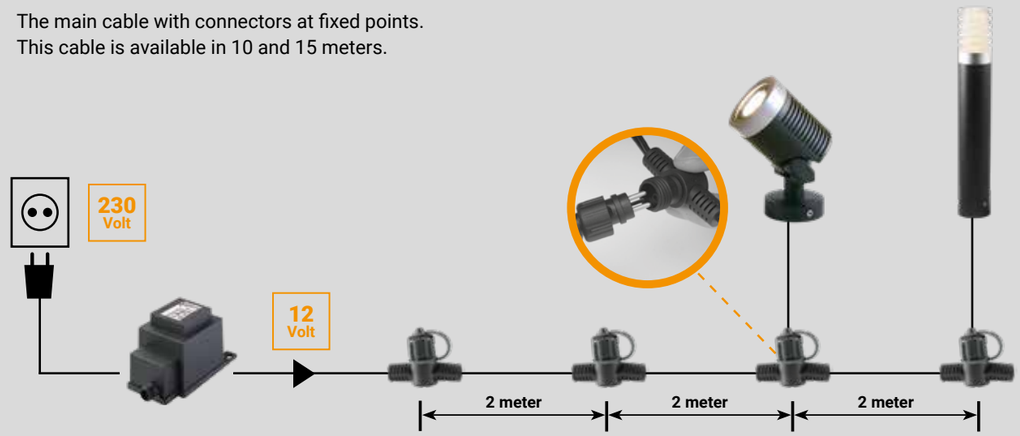
System Flex

The Flex main cable without fixed connectors.
This cable is available in 10, 25 and 50 meters.

With the Flex main cables you can decide for yourself where you want to connect the lights on the cable. You simply place the female Flex connector on the cable wherever you want. Open the connector, insert the cable and close the cover. Then connect the lights' cable to the female Flex connector. The Flex main cable is available in 10, 25 and 50 meters.

System Fixed

The main cable with connectors at fixed points.
This cable is available in 10 and 15 meters.



This main cable has fixed connectors on the cable. You can choose the main cable of 10 meters with 4 connection points or the main cable of 15 meters with 6 connection points. The lights' cable has a male plug that you simply connect to the fixed connector on the main cable.

Safe for children and animals

12 Volt | **Plug & play** | **5 years warranty**

Make your garden **Smart**

With Garden Lights Plus, you can make your 12-Volt garden lighting system smart, whether you own a Garden Lights system already, or just want to install a new system.

Most of the time, warm white light is all you need, but at other moments, a colour might fit better. With the option to select various colours and warm white, you can choose the right ambience for your garden. Really like your current colour setting? Save the scene so you can activate it whenever you want.

Becoming even smarter

garden-lights.com/smart

Download the app here

Smart lights

Would you like to control your lights separately, dim them, or change the colour of them? Then use smart light bulbs. Our smart lights are easy to install. Place them where you want in your garden, connect them to the 12-Volt system, and then link the lights to the Garden Lights app. You're now ready to set the lights.

The benefits of the Smart Plus lights

+ control lights separately;
+ determine the colour of the light;
+ dim the light intensity;
+ set different timers simultaneously;
+ create different zones;
+ save your favorite settings as a scene.

Accessories

The installation of 12-Volt outdoor lighting requires accessories such as: transformers, cables and connectors. A motion detector and remote control can also be a good addition to the lighting plan.

12 Volt transformers

UK	EU	
6273011	6270011	max. 24 W
6213011	6210011	max. 60 W
6214011	6211011	max. 150 W

Choose your Garden Lights cable system

Cable system Flex

* Connector tool included for easy installation

12 Volt Flex main cables*

6259011 Flex maincable 10 meters (SPT-2W 16AWG)
6260011 Flex maincable 25 meters (SPT-2W 16AWG)
6281011 Flex maincable 50 meters (SPT-2W 16AWG)

12 Volt Flex Connectors

6261011 Female
6262011 Male

Cable system Fixed

12 Volt Main cables with fixed connection points

6007011 10 meters with 4 Connectors (SPT-1W 18AWG, max. 120 W)
6008011 15 meters with 6 Connectors (SPT-3W 16AWG, max. 150 W)

12 Volt Connectors

6013011 Connector (SPT-1 > SPT-1)
6014011 Connector (SPT-1 > SPT-3)
6165011 Screw connector SPT-1
6166011 Screw connector SPT-3

CONNECTOR
Repair of
defective cables

SCREWCONNECTOR
Light connection

12 Volt Extension cables

6154011 Extension cable - 2 meters (SPT-1W 18AWG)
6005011 Extension cable - 6 meters (SPT-1W 18AWG)
6056011 Extension cable - 10 meters (SPT-3W 16AWG)
6177011 Extension cable - 2 meters rubber

Cable Splitter

6006011

Cable splitter
15 cm SPT-2W 16AWG
(with 3 connectors)

12 Volt Remote Control + Outdoor Receiver

6148011 **12 V Remote + Receiver, max 150 W**
6149011 **12 V Receiver, max 150 W**

- Control 9 groups of receivers separately with one remote control
- Range up to 40 meters (in open terrain)
- Radio frequency

12 Volt Dusk to Dawn Sensor + Timer

6009011

- Max. 150 W
- 1 Meter cable
- On/off
- Dusk- / dawn sensor
- 1-9 hours

12 Volt Motion Sensor

6156011

- 3 Meter cable
- Turns on automatically when approaching the detection area
